SILVER STAR PCS INSTALLS NEW WIRELESS TOWERS

DRIGGS, ID- In the 4th quarter of 2007 Silver Star PCS completed construction of two new wireless cell phone towers in Jackson Hole. The first on Snow King Mountain will provide enhanced CDMA coverage in the town of Jackson, providing better coverage from Highway 22 and Broadway ("The Y") west to the Moose-Wilson Road junction. The 2nd Jackson tower, located in Squaw Creek, will extend coverage to southern end of Jackson Hole from Rafter J towards Hoback Junction. Additionally, Silver Star is currently working to install a tower at the base of the Jackson Hole Mountain Resort. Silver Star currently has a tower located on the mountain, but the additional tower at the base will improve "in building" coverage at the base.

Silver Star PCS wireless customers commuting or traveling to Jackson, WY will now benefit from the addition of the new towers. These new sites are a part of the network expansion plan that increases the number of local Silver Star PCS cell sites to fifteen towers between Jackson and Teton Valley, not including Star or Swan Valley. These new additions bring Silver Star's network investment close to 3 million dollars.

"We feel that these new locations will assist us in our commitment to provide superior coverage for our cellular customers," stated Tom Byers, Wireless Operations Manager for Silver Star PCS. Mr. Byers came to Silver Star PCS from T-Mobile to assist with the creation of the Silver Star network.

In an effort to provide the best cellular coverage possible, Silver Star's local network currently covers Jackson and Teton Valley with locations at the top of Teton Pass, Jackson Hole Mountain Resort, Snow King Mountain, Snow King Lodge, Rafter J, High School Road, Squaw Creek, Cities of Victor, Driggs and Teton, Alta, Grand Targhee Resort, and Clementsville. The company also plans to complete another tower in Teton Valley near River Rim in the first quarter of 2008. To ensure customer satisfaction, the company offers "test drive" phones for individuals wishing to try the service prior to buying.

About Silver Star PCS

Silver Star PCS, an affiliate of Silver Star Communications, is a premiere wireless provider offering cellular service to residents in Star, Teton and Swan Valleys, and Jackson. Silver Star PCS has national coverage with local customer service offices in Star and Teton Valley and Jackson. The company, which began wireless operations in 2005, is continuously expanding its calling network to accommodate the coverage needs of its customers and its mountainous geographic territory.
